

THE EMPRESS EXPRESS

VOLUME XV, No. 44

EMPRESS, ALTA. THURSDAY, Mar 29, 1928

Price: \$2.00 Per Year

United Church

Church School, 2:00 p.m.
Do we appreciate as we should the privilege which is ours every Sunday, that of attending the church school for an hour's worship and Bible study? Let us show our appreciation by our attendance, both parents and children, next Sunday afternoon.

Public Worship, 7:30 p.m.
With the commencement of Easter week, we cannot but face the challenge which confronts us in the conduct of Jesus during the last week of his ministry. There are crosses for all of us, and some common problems will be considered in the Minister's message, "The Cross Before Calvary."

The choir will lead in the service of praise.

You will be welcome—bring your friends. Sunday evening's worship should help us to prepare for a real observance of the Easter season.

Rev. N. W. Whitmore, Minister

Legislature Prorogues

After Busy Session

General satisfaction is expressed by Premier Brownlee and the members of the cabinet with the work which has been done during the session of the Legislature which prorogued on Wednesday, March 21, having sat from February 2. A total of 79 bills were passed by the Legislature during the session, eight of which were private bills and 71 public bills.

It is considered likely that a short session of the house may be called during the summer to consider a number of matters on which final action was not possible during the recent session. The premier expects to leave during the coming week for Ottawa. The satisfactory disposition of the northern railway lines and the return of the natural resources to the province will be among the problems which will engage his attention during his eastern trip.

Easter Devotional Services In the United Church

Each evening next week, Saturday excepted, there will be held an Easter devotional service to which all are cordially invited. They will commence promptly at eight o'clock, and will be of an hour's duration.

At all seasons of the year we need to be guided by the source of true living: Jesus Christ, the Ideal of Humanity, and the favored of God—and it seems particularly fitting that throughout Passion Week, we should try to keep before us the things that matter, as revealed in Jesus.

The addresses to be delivered by the minister, will follow the general theme, "The Beauty of Christ, and the topics for the several evenings, are as follows:

Mon.—His Face; What is it Like?

Tues.—His Eyes; What is their Power?

Wed.—His Hands; What is their Task?

Thurs.—His Feet; Where do they Go?

Frid.—His Personality; What is its Beauty?

Following the address on Friday evening, which will be Good Friday, a communion service will be held, in which all who desire may participate.

Leland Community Hall

Public worship, Sunday at 2:30 p.m. A hearty invitation to one and all.—N. W. Whitmore, Minister.

Looking and Overlooking

If we notice little pleasures As we notice little pains; If we quite forget our losses And remember all our gains; If we looked for people's virtues, And their faults refused to see,

What a comfortable, happy Cheerful place this world would be.
—Writer Unknown.

Agricultural Meeting at Leland

The new Leland Hall housed its first agricultural meeting on March 22. Mr. J. N. Murray addressed the meeting, and chose a timely subject dealing with varieties of wheat, the treatment for smut and related topics.

Dealing with some of the factors which had to do with the production of wheat of high quality, Mr. Murray placed first the selection of the right variety. Many new ones have been introduced during the past few years, but we still have no better variety than Marquis. Indeed, Marquis is so many good qualities that it may be years before a better wheat is produced. It is a good yielding, good quality, does not shatter and has straw of fair quality. It sometimes yields well, Marquis and Red Bob may be used, but other early varieties are less desirable.

Renfrew is the only late wheat which should be encouraged. It sometimes yields well, Marquis and Red Bob may be used, but other early varieties are less desirable.

The need for pure grain was emphasized, as it is impossible to get a grain of first quality in several varieties of different types are mixed together. In order to get a start with pure seed, the purchase of a few bushels of registered seed was recommended. Pure seed for 10 acres will grow enough for the whole farm in many cases and will transform the quality of grain in a few years.

Mr. Murray strongly advised the starting of a Standing Field Grain Competition. The Prov. Dept. would undertake to judge the fields and would pay half the prize money up to a reasonable limit. He hoped that some organization in the district would get behind the scheme and see it through. He expressed the opinion that as good a wheat could be grown in this district as anywhere in the province and if the wheat growers here would set about it, they could bring to the district some of the big prizes that are going to other parts of Alberta every year.

Mr. John Fowle, S. S. C. Plains, also addressed the meeting briefly on the work of the U. F. A. and Wheat Pool.

For Sale

4 1/2 ft. Brass Belvedere with box springs, \$10.00. Sofa with leather cushions, \$15.00.—Call at residence of N. D. Storey, Empress, on Saturday.

Board of Trade Meeting

Regular meeting of the Board of Trade held in the hotel rotunda, March 27. (This meeting followed Golf Club meeting.) J. N. Askeron, president, occupied the chair.

Correspondence was read by the Secretary, A. Harkin.

Chief discussion centered around the matter of joining the Western Canada Auto Assoc.

On motion of Mr. McNeill it was resolved that the Board join the Association.

It was resolved that a local Auto Association be formed to collect funds for this purpose. D. McEachern, pres. and Norris Storey, secretary; were officers elected.

It was then moved that the money necessary for fees should be taken temporarily from Board of Trade funds.

A vote of thanks was passed to Mr. T. Rowles for his endeavors to secure road improvements and repairs adjacent to town.

W. Storey was appointed a committee to secure information as to a local Fish and Game Association.

Golf Club Meeting

The annual meeting of the Empress Golf Club, was held in the hotel rotunda, March 27. A. Harkin, vice-president opened the meeting. The Secretary, W. Storey, read a financial report of the Club's standing which showed a bank balance of \$91.00.

The election of new officers resulted as follows: T. Wallace, president; C. R. Moore, vice-president; W. Storey, secretary. Tournament committee: D. McEachern.

Membership fee was set at \$2.00 gentlemen; \$1.00 ladies. Discussion ensued as to date of first tournament and preparation of course, after which meeting adjourned.

Shipment of Coal

Starts on April 15

Drumheller, March 28. Advice was received from Ottawa, Monday afternoon that April 15th is the date set for coal shipment from Alberta to Ontario under the provisions of the order in council granting a 6.75 freight rate to Ontario.

How to name a Chinese baby in honor of Lundberg and still retain the oriental touch in the youngsters cognomen puzzled Mr. and Mrs. Lee Long of Chicago's Chinatown. Finally they hit on the name One Long Hop.

W. S. Wehlander,
Applicants.

Flood Waters in Rivers; Bridges Are Carried Away at Various Places

The warm weather of last week played havoc with the ice in the rivers. A jam of ice took place in the Red Deer river about a quarter-of-a-mile above the bridge. Anxiety for the safety of the bridge was felt. The waters of the river also backed up and the river flat and the low-lying land was completely inundated for a considerable distance. Cattle belonging to Mr. Wm. Highmore, were stranded on a high piece of ground and completely cut off by the flood water. The crop of Mr. Adel Bishop, which he was unable to get threshed last Fall, was also completely submerged, the water almost surrounded the house.

As a result of the heavy ice caused by the sudden thaw and the immense amount of water flowing into the river courses, bridges are reported to have been taken out at various places. Bridges at Bassano, Duchess and Cluny were reported as damaged.

The sudden abnormal rise of the Saskatchewan river at the South ferry crossing, almost succeeded in washing away the partly completed ferry scow, which is in process of building. The river is reported to have backed up some twenty feet above height of normal flow.

All-its Struck Wins Prizes At The Saskatoon Fair

First prizes in carload lots of steers, in both heavy and light classes at the Saskatoon winter fair during the past week were awarded to Mackenzie Bros. of Lacombe, Alberta, who had three choice entries in the show. In the class for steers weighing over 1,100 pounds second prize went to the entry of Paul Gabriel of Erskine, Alberta.

Convention of Alberta Educational Association

The Eighteenth Annual Convention of the Alberta Educational Association will meet in Central United Church, Calgary, April 10, 11, 12, 1928.

Any person interested in Education is free to attend and may become a member by paying the membership fee of one dollar.

Reduced fares on the railway may be obtained by buying single reduced fare tickets and asking for a standard certificate which signed by secretary entitles the holder to a half fare return. These tickets are good for ten days.

The speakers this year are General Sir Arthur Currie, principal and Vice-Chancellor of McGill University. Dr. H. T. J. Coleman, Dean of Arts and Science and head of the Department of Philosophy in the University of British Columbia. Dr. M. E. Lazzeri a former P.S. Inspector, teacher and a professor of Philosophy in University of Alberta. Miss Dorinda Dickie teacher in Calgary Normal School, student at Oxford and author of several books on Supplementary Reading. Mr. C. C. Bremner Inspector at Macleod will also speak as will Mr. A. E. Hahn, B.A., instructor in Calgary Normal School.

Two debates on "Methods of Administration" and "Demand for Secondary Education" by well known Educationists are sure to create tremendous interest, and should appeal to the trustees as well as teachers.

You are invited to attend the Easter devotional services in the United Church next week, every evening but Saturday.

Land For Sale

The undersigned, in order to close an Estate, will receive offers for the purchase of North Half of Section 35, Township 23, in Range 4, West of 4th Meridian, containing 320 acres. All offers must be in writing and accompanied by accepted cheque payable to the undersigned for the full amount offered, and must reach the undersigned on or before the 1st April, 1928. The highest offer or offer may not be accepted.
JOSEPH M. NIWA, P.O. Box 165, Empress, Alberta, Executor of the Estate of the late Mrs. Kathleen Pawluk, deceased.
EMPRESS, Alberta, March 27, 1928.

For Sale or Rent

320 acres, 3 miles from Camdenville, 240 acres brook, fenced, good buildings, lots of water. Ideal for cattle or sheep. Cash \$1800. Rent, one-third.—Ernest Haines, Camdenville.

Dress Up for Easter

We have some very pleasing styles and colour shades in

Neckwear from 50c. up Why not invest in a new Tie and feel well dressed.

HATS

We have some nifty buys in Felt Hats also Cloth Caps, just the right style of head gear for Spring Wear.

Dress Shirts and Shoes Our assortment in these lines is sure to please you. Prices right. Best values for the money.

Just towards Carnival time in Quebec examples of ice statuary begin to appear in the streets. This statuary ranges from very modest ice arches to most ambitious conceptions such as a railway locomotive, a dog team and sled or a carliole (habitant sleigh) complete with horse and "bon homme et bonne femme." These statues are not frostbitten bits or carnival decoration but embody very real artistic values and are usually set up before the Chateau Frontenac.

Tapping Wealth Of Northern Canada

Canadian National Railways Engineer Tells Of Rapid Development

The tremendous North of Canada, the rich country in which millions have been invested and out of which millions more will be taken in speedily coming into its own. Two railway lines, which are being pushed forward with all the energy and haste men can command in a region that exacts every ounce of skill, strength and speed that men can give, are bringing the wilderness closer and closer to the world. They are making possible the pricing open of a chest whose treasure is so vast that imagination scarce can compute it. Before the year is out the railway which is striking 85 miles northwest of The Pas to open up the Flin Flon and incidentally the other rich properties in that area will be in working condition. In the meantime, the necessary supplies will have been hauled in and camps established along the way. By the end of next year, Hudson Bay Railway will have reached its terminus at Fort Churchill, on Hudson Bay, and the North will have a new outlet to the world.

C. S. Gowaski, of Montreal, chief engineer of the Construction Department of the Canadian National Railways, who has just returned after a visit of inspection to the northern country, declares that he is well satisfied with the progress that is being made.

"To fulfill our promise to the Dominion Minister of Railways that the Hudson Bay line would be in operating condition by the end of next year, we must complete 84 miles from the present end of steel before December, Mr. Gowaski says. The present end of steel is 256 miles from The Pas, which is 482 miles from Winnipeg. The end of steel to Fort Churchill, the distance is 144 miles. "There is no doubt but that this will be accomplished," he added. "The road is broken through for 84 miles and the contractors are busy erecting camps and getting in supplies. By the second week in February, Major J. L. Charles, who is in charge of the Canadian National Railways locating party, had reached Mile 100 and was, of course, still pushing ahead. He is using dog teams."

Since there are no means of communication in the summer, Stewart and Cameron Ltd., who have the contract for grading the line, are concentrating, during the winter weeks, on the task of bringing in supplies and caching them. Mr. Gowaski pointed out. Before the break-up, at least 1,500 men will have been placed and will be engaged in ditching. After the important work of drainage, comes the building of the embankment. It is hoped that track-laying will begin by July 15. In order that there will be no delay, culverts are being placed ahead for the first 20 miles, each being built for the purpose, and the three streams which the railway must cross are being spanned by pole trestles, which will be replaced by permanent structures later. Three temporary water supply tanks are also being installed in places where the track-laying and track laying.

"Our big battle is, of course, with the muskox," said the engineer, in discussing the difficulties of railroad-building in the north. "Near the Limestone River we are cutting 200 carloads of poles and will be engaged in ditching. After the important work of drainage, comes the building of the embankment. It is hoped that track-laying will begin by July 15. In order that there will be no delay, culverts are being placed ahead for the first 20 miles, each being built for the purpose, and the three streams which the railway must cross are being spanned by pole trestles, which will be replaced by permanent structures later. Three temporary water supply tanks are also being installed in places where the track-laying and track laying."

"Two hundred men and 120 teams are now working on the right-of-way outside the right-of-way. Besides the men on the Churchill section, 230

men are engaged along other portions of the line and three work trains.

"Four headquarters camps, more than half the total number to be built, have been erected, and others are under way. The contractors are erecting, for the railway, eight engineering camps as well, three of which have been completed. At Mile 84 from the present end of steel they are building for an engineering headquarters camp of four log buildings. This will be the base for working down the Deer and Churchill rivers for the line ahead.

"The caches I referred to are 10 miles apart but camps between mean that the men will not have to travel more than five miles. To make it easier for them in the summer, 20,000 'duck mails,' plank platform 'float' mail, will be put down in the soft places. There is no river transportation here and no timber for building a corduroy road."

How Rockies Got Their Name

The Name Is Believed To Be Of Cree Origin

The name "Rocky Mountains" appears to be of Cree Indian origin. Long before the advent of the white man the Indians of the Canadian prairies, gazing at the glistering line of peaks stretching across the West, called them the "Shining Mountains." Legardeur St. Pierre in his journal, 1752, stated that among the Cree they were called "Assin-wai," that is, literally, "snowy or rocky mountains." He translated the name into French—"Montagnes des Roches"—and by the English equivalent they have since been known.

Hydro-Power On Niagara River
On the Niagara River, the water-power of which is shared between Canada and the United States, five to six million horse-power could be developed, but by international treaty the United States is restricted to a total diversion of the flow of the river to 20,000 cubic feet per second. This, "treating" process is said to add from 30 to 60 years to the life of the wood.

The Value Of Sheep Clubs

Responsible For Establishing Over One Hundred New Flocks In Canada Recently

Boys' and Girls' Sheep Clubs have been responsible for establishing over one hundred new sheep flocks in Canada recently. They are proving a big factor in creating further interest in sheep raising and are likely to be the means of establishing thousands of sheep flocks on farms where sheep are not at present being kept. Sheep club members have the co-operation of the Canadian Banking institutions in providing loans subject to the regulations of the policy, if such are desired. The policy is administered by the Sheep and Swine Division, Live Stock Branch, Canadian Federal Department of Agriculture, in co-operation with the Provincial Departments of Agriculture. District promoters in the various provinces in which the policy is operative give assistance in selecting suitable ewe stock, give direction and assistance in equipment of buildings, feeding and management. The Canadian Co-operative Wool Growers, Ltd., Canada's national wool marketing agency, operated by the sheep raisers, ensures full market values for the wool clip. Sheep Raisers and Lamb Sales Exhibits and shows, reduce marketing costs and encourage the production of better lambs. Sheep raising is recognized as a branch of the live stock industry that has proved to be very profitable and is strongly recommended for consideration by prospective settlers.

Yukon's Healthful Climate

Continuous Daylight In Summer Time For The Whole Twenty-Four Hours

The climate of the Yukon Territory, Canada, is characterized by a moderate precipitation. There is no more delightful climate than that which prevails from May 1 to October 1. The continuous light for the whole twenty-four hours, during the period from the middle of May to the first week in August, although anticipated, is a source of delight and wonder to the visitor. While the winters are long and cold, on account of the absence of high winds and the dryness of the atmosphere, the low temperatures are borne with less discomfort than in other parts not so favored.

Receive Big Contract

A Calgary firm, the Alberta Wool Preserving Company, has been awarded one of the largest wool preserving contracts ever given in Canada. It has an order from the Canadian Pacific Railway for the treating of 300,000 tons a year. Over a five-year period, 1,500,000 tons altogether. This "treating" process is said to add from 30 to 60 years to the life of the wood.

New Comer Prizes His Land

But To Many Canadian Farmers Ownership Means Nothing

No Canadian need be pained when a European family is placed on a farm from which a Canadian farmer has removed itself. Yet this is what is going on in some parts of the country. The original Canadian stock is leaving the land and getting into the towns and cities. The same process is going on in many sections of the United States and is regarded with alarm by students of the social order in that country. The newcomer from Europe prizes the land to him it is a great boon to be able to own a hundred acres. The Anglo-Saxon in this country regards the land lightly. Ownership means little to him and in many cases he would prefer making his living somewhere else.

Yukon's Healthful Climate

Continuous Daylight In Summer Time For The Whole Twenty-Four Hours

The climate of the Yukon Territory, Canada, is characterized by a moderate precipitation. There is no more delightful climate than that which prevails from May 1 to October 1. The continuous light for the whole twenty-four hours, during the period from the middle of May to the first week in August, although anticipated, is a source of delight and wonder to the visitor. While the winters are long and cold, on account of the absence of high winds and the dryness of the atmosphere, the low temperatures are borne with less discomfort than in other parts not so favored.

It is estimated that more than 300 languages are spoken throughout the world.

Don Strickland is a druggist, believe it or not, at 241 South Burdick Street, Kalamazoo, Mich.

It sometimes pays to be good, but it is always good to be paid.

Good Crops Have Established Prosperity

Farmer's Position Has Been Greatly Improved, Says Report

"In contrast with the situation in Canada, where the price structure has consistently favored the farmer, particularly during the past three years, the farmer in many other parts of the world has found it difficult to get his crops sold at a price which would enable him to buy about two-thirds of the much manufactured goods as formerly," states a recent bulletin issued by the Royal Bank of Canada.

"In reality his difficulties have been even greater than this statement would suggest, since wages, rent and taxes—his costs—have in most cases increased by at least 100 per cent," continues the bulletin. "Where the individual farmer has been unable markedly to increase his production, the changing relationships of prices have reduced the purchasing power of the farm family by about one-half. This reduction in the purchasing of the agricultural population has prevented the expansion of world commerce to a normal level."

"The satisfactory crops in Canada and the persistence of relatively favorable world prices for these products which come from Canadian farms have been important factors in establishing prosperity. While it is true that almost all of Canada has experienced good times during this period, the outstanding factor in the prosperity has been the improvement in the position of the Canadian farmer."

One Of Sweetest Stories Ever Told

Annual Consumption Of Sugar In Canada Is Almost One Hundred Pounds For Each Person

One of the sweetest stories ever told is outlined in a recent report of the sugar refining industry in Canada, by the Canadian Government Bureau of Statistics.

Canadians evidently have a sweet tooth, for the annual per capita consumption of sugar is 85.69 pounds, or about one-quarter of a pound for every day of the year. The total production of sugar in Canada in the year 1926-27 was 1,135,741,729 pounds, of which 70,388,105 pounds was made from beets grown principally in southwestern Ontario and southern Alberta. Thirty thousand acres were sown to beets, which yielded about nine tons per acre, and for which the growers received an average price of \$5.55 per ton. The total value of the yield was \$2,286,781.

There are eight sugar refineries in Canada with a capital investment of \$40,748,049. Canada is one of the principal sugar refining countries, her net exports of refined sugar, after supplying her own requirements amounting to about 250,000,000 pounds yearly.

Cannot Be Called Inmate

People Who Fall To Control Their Impulses Have To Be Punished

It is the business of men to control their impulses. When they can do so—and possibly there are a few who can not master an impulse to murder—they are unfortunate, but not inmates. The man who knows what is right and what is wrong, who knows that what he is doing is wrong, is quite sane enough to pay the penalty prescribed by law. It does not matter whether or not he is the victim of a "split personality" or is afflicted with "dementia." These are interesting peculiarities, but they are no defense—and are not inmates.

Machinery For Bragging Plant

Machinery for the bragging plant at Bientaf has been purchased in England and Germany and is to be shipped before May 15th, according to the representative of the Western Dominion Collieries, who went overseas to arrange this and has just returned to Saskatchewan.

"My poor husband was a wonderful artist," sighed the landlady as she poked at the pile crust, "and always had he found inspiration in my cooking."

"A sculptor, I presume," said the gloomy boarder, surveying his best floor.

In China, according to Capt. M. B. Curtis, of the United States Marine Corps, every soldier takes his wife to war with him. It may be the most important plan to keep the boys in a fighting mood.

"Now that you are married, I suppose you will take out an insurance policy?"

"Oh, no. I don't think she's going to be dangerous."

Engineers Plan To Cool Tropical Zone

Have Evolved Scheme For Diversion Of Arctic Currents

Utilization of the icy currents which flow beneath the warm Southern seas for modifying the climate of tropical lands and rendering them not only pleasantly habitable but workable as well is foreseen by two French electrical engineers, Georges Claude and Paul Bouchard, of the French Engineering Society at the Sorbonne.

Moreover, they asserted, the tropical seas could vast stores of thermal energy which man may yet harness. Although the surface waters of tropical seas generally have a temperature of from 75 to 85 degrees, from one end of the year to the other, as, pointed out, have, thanks to currents, been cooled from the polar regions, waters at great depths at a constant temperature of from 35 to 40 degrees.

If, with the aid of a shaft sunk into the sea, these cold waters could be brought to the surface, the engineers said, the result would be a surface temperature of about 70 degrees, a very welcome result in all seasons and all waters.

Then, one could draw off the warm surface waters into a suitable vacuum, they asserted, the waters thus drawn off would begin to boil, produce a vapor which, with the aid of the cold waters brought up from the depths of the sea, might result in a constant rain.

And if in the current of vapor one placed a turbine, they declared, the machine would furnish energy beyond comparison with anything in existence.

Only Sense Not Protected

Law Does Not Interfere With Things Which Offend Our Sight

If you punch a man on the nose, he can have you arrested. The law protects our sense of feeling. If your factory pours noxious fumes over a city, your neighbors can get out an injunction against you. The law protects our sense of smell.

If you put out even harmless chemicals in drinking water, you can be sued for it. The law protects our sense of taste.

If you run your loudspeaker at unreasonably high volume, the Board of Health will have something to say about it. The law protects our sense of hearing.

But— You can stick an ugly advertising sign beside a public highway in the most beautiful spot for miles around, and the law will probably protect you through the courts of last resort. Why are our eyes discriminated against? Why is sight the stepchild in the family of senses?

Probably it will stay so until the majority of the people are as unanimous in their denials of bad sights as they are in their denials of bad smells.

Sheep Raising In B.C.

Sheep Production In Province Increased By 37 Per Cent. Last Year

The sheep raising branch of the agricultural industry is developing rapidly in British Columbia, particularly in the logged off areas along the mainland coast and on Vancouver Island, according to a report of the Vancouver Chamber of Commerce. The province increased sheep production 37 per cent. in 1927 over 1926, the latter year also having an increase of 26 per cent. over the year previous.

Doctor: "Your health is excellent, William. I don't find anything wrong."

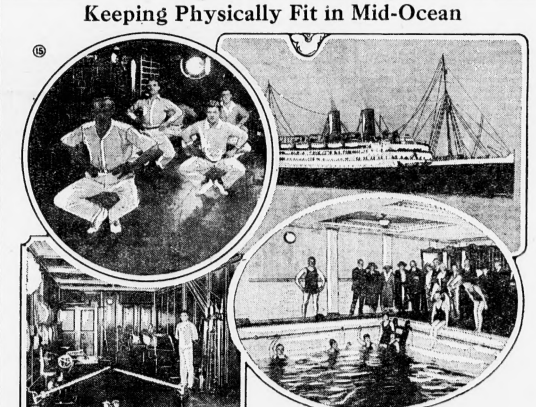

Lady Patient: "Won't you please look again, doctor? You see, all my friends are going to 'Hot Springs' for their health."

Don't condemn a man for beating his wife until you ascertain whether he used a club or a pack of cards.

Tell-tale Barber: "Would you mind closing your mouth?"

Customer: "Would you?" — Russ Hunsicker, Madras

Upper left—A phoned class in exercise. Upper right—The Canadian Pacific liner, "Empress of Australia." Lower left—Interior of the ship's swimming pool. Lower right—A motor launch.

A gymnasium on board an ocean liner is no longer a novelty. The floating palaces of today which cross the mighty oceans between Canada and the Orient, and Canada and Europe, have gone on better than the best hotels. There are hotels in this country that can invite their guests to bath in the sea, and there are no fewer than a hundred of them; but how many of them can offer the busy man or woman the use of a gymnasium?

"How to keep it at sea?" Board one of the famous "White Empresses," bound for the Orient from Vancouver or from Quebec, to Southampton by an "Empress of the Atlantic." These liners have gymnasiums on board, and you will have no reason to fear the consequences of a period of enforced leisure. On the Pacific the "Empress of Canada," "Empress of the Orient" and "Empress of Australia" have swimming pools, which are in the first rank of those to be found on board sea-going ships.

The apparatus with which the

gymnasiums of the ships of the Canadian Pacific line are fitted is varied and diverting. The "horse" and the "camel" are perhaps the most popular among the machines. When travelling in the "Empress of Australia" and the "Empress of Scotland" to and from Canada this summer the "Camel" machine is a most useful and interesting device. It simulates the movement of a horse in a canter, and gives the rider a real and pleasant sensation of horse-back riding. The speed can be increased from a walk to a trot, from a trot to a canter, and from a canter to a gallop; but the "horse" is always gentle heart and never throws his rider.

The "Camel" machine is as popular as the "horse." The "camel" functions in a similar manner to the horse, but performs the rolling motion peculiar to the "ships of the sea." The "camel" usually works over the longer voyages and winter cruises made by the Empresses, classes for special exercises are frequently held.

There are bicycle machines in the gymnasiums of the Empresses. These are fitted with disks which record distances travelled up to 500 metres. Bicycles are placed side by side, which offers the possibilities of racing competition.

Rowing machines, push-machines, which test the strength and develop the muscle, are amongst the apparatus with which the gymnasiums are equipped, and boxing-gloves, melleo-balls, punch-balls, foil, single-sticks, and Indian clubs, provide for the exclusive use of the lady passenger.

The gymnasiums themselves are spacious rooms, well ventilated, and lighted by electric lights which help to keep the air always fresh. During certain hours the rooms are reserved for the exclusive use of the lady passenger.

A physical instructor is on duty in the gymnasiums during the regular trips. He instructs passengers in the use of the machines, and during the longer voyages and winter cruises made by the Empresses, classes for special exercises are frequently held.

Expedition To South Pole

This is the "Sampson," the Norwegian ship which Commander Richard E. Byrd's expedition to the South Pole will use. He will also have a three-motored plane, which he hopes to fly over the Antarctic Zone.

COPYRIGHT, CANADA, 1925

CHAPTER XIX.—Continued.

It was strange for Arthur Warner, after all his lonely years, to be sitting here talking so intimately to a woman who was not his wife, a stranger, and receiving from her confidences which she had given to no one else. He thought of his own lonely house—so pleasant to him, so eagerly acquired, so patiently won—for—how a woman like this could be so bright and so graceful in his presence. She was not calm, as brave, so gentle.

When they were left Helmi smiled encouragingly at him, though really, too, as if the tears were not very far away. Where they tears because he was going?

"Helmi," he said, "we are both facing the elemental things of life, and it draws us together. We are facing the hardest things; that men and women ever have to face. Your part will be to give life, maybe at the expense of your own. Mine is—God forgive me—to take life. Are you afraid?"

Helmi shook her head. "No," she said, simply, "I believe in God—I believe He loves me and love Him. Every day I say my good words. I learned them in His house. They are: 'Serve health; Seek truth; Know God; Cherish others.' Then I say, 'Please God, bring home my Jack.' It is good to pray, Mr. English, when one is afraid."

"The first ragged whistle of the train came booming down the valley. 'Tell me your name Helmi,' he said, 'I want to say good words for you and for your Jack.'

Helmi took his hand and impulsively kissed it. "Helmi Doran," she said, "I am glad you will say good words for my Jack. Maybe you will see him over there—I know he will be there."

"I hope for your sake that it will all be over when Jack comes home at Christmas."

He was standing up now with his cap in his hand. The train was whistling again, as it came slowly down the grade. Helmi looked at him reverently. It was not merely a lonely, weather-beaten housewife she saw standing before her; she saw a brave man who was willing to give up his life for his country, and she saw the man who possessed, not withholding his own life, for the cause of human liberty, and on his face she saw the unmistakable majesty which comes to those who are appointed to die.

Arthur Warner bent over and kissed her shining hair. "Good-bye, dear Helmi," he said.

"Good-bye, God bless you, dear Mr. English."

When Arthur went out he left Mrs. McClung coming in. She had come presumably to ask Helmi what she had done with the tape-line.

CHAPTER XX.

It was in December that Helmi decided to delay no longer, she would go to the city. Jack had told her to go to his mine and get the two

Demonstrates New Camera

Spark Instead Of Shutter Gives More Exposures Per Second

Moving pictures taken at the rate of 20,000 exposures a second showing a bullet apparently barely moving as it struck a glass bulb shown through a meeting of the Optical Society of America.

Professor Alexander Klein, of New York University, who gave the demonstration at Columbia University, said the camera used was similar to an ordinary one except that it spark vibrating with high frequency took the place of a shutter.

Pictures of a whirling aeroplane propeller, taken at the rate of only 2,100 a second, showed the blades turning at a rate not much faster than a slowly revolving door.

The pictures of the bullet shattering the glass bulb taken at the high frequency exposures showed the shattered glass fragments falling through air so slowly as to be hardly perceptible.

Countless tests and experiments, covering a period of over thirty years, prove that

aluminum is the only completely satisfactory material in which to pack tea. Red Rose tea is put up only in aluminum, and a "money-back" guarantee goes with every package. 2W

slipped down the mountain, without a sound, and laid low every stalk and every bloom in his garden, and having done its work went back the way it came. The morning sky was blue and bright, the sun was warm, and playful little breezes turned the dead dovers over, just to be sure that none were missed. When Helmi came out and saw the work of the night she wrung her hand—but only for a minute. That day she raked the dead stalks into a pile, and she burned them when they were dry and dug the garden for her next year's planting.

Helmi had not yet brought herself to ask for the two hundred dollars. Jack had left; she wished the time-keeper would give it to her without asking for it, but the days were over and she knew she must go soon. She would not let Mrs. McClung or anyone think she was grieving or distressed. Jack had told her that the greatest thing in married life was to trust and not be afraid, so she affected a gaiety she did not feel, which quite deceived the "vint' lady."

"These foreigners haven't got any fine feelings," Mrs. McClung told her friend Mrs. Turner. "Now one would think Helmi would feel a little shy, but pass her house any time you like and you can hear her singing, and as long as the days were nice and she had other work in the garden or sitting outside sewing, and mind you, she went into the store and asked for white flannel for Jim. Doves—Mrs. Dawson told me. Well, of course, one can't expect much from these foreigners, their standards have never been like ours. Mr. McClung often told me I was too shy, but it was the proud Weekes way."

Helmi waited until the middle of the month, still no letter, no word. There was no use going to the post office. The same answer was inevitable—Helmi's letter, she could hear it all the time, beating, beating on a sore spot in her heart. But always she had been able to say, and say something, words she had prepared on the way down.

One day she went to the sturdy little mine office and spoke to the time-keeper about the wages Jack had in his last check. The timekeeper sat in his shirt-sleeves, and he looked at her. The piece reeled of the wine-bacco, and dust lay gray on the window-sill. Quite frankly Helmi explained her reason for going to the city.

The timekeeper looked confused and embarrassed. "An awful sorry," he said, "but it looks as if there has been a mistake here some place. There was two hundred dollars here when Jack was here, but a man came one day with an order from Jack and I gave him the money. He said when Jack got to Peace River he found there were some things he needed. It was about a week after Jack left, if I remember—I have the letter here, if you would like to see it. I don't know you would be wanting it, or anything, or I would have refunded this fellow, but he had the order and I couldn't very well do anything but pay the money over."

(To Be Continued.)

As the man of woman stood to act out in his victim. What can be more terrifying than to suddenly be seized with a paroxysm of choking which seems fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and priced in every section of this broad land.

Peace, Perfect Peace

Extract From a Letter Sent By a Soldier To His Wife

The following precious preserved extract from a love letter written home to his wife by a soldier on active service will evoke tender memories in thousands of our former service men.

"Don't send me no more nagging letters, Little. They don't do no good. I'm three thousand miles away from home, and I want to enjoy this war in peace."

Employer: What kept you from work yesterday, acute indigestion.

Typist: No; a cute engineer this time.

All speed limits were exceeded in the last minute rush for motor licenses.

Leprosy is supposed to have been brought to America by the negro slaves.

A Lady and a Diplomat

Difference Between Them Is Defined

By U.S. Minister

His Excellency follows the methods of the public men of his country who provide at least one funny story to a speech. In paying tribute to Canadian women's organizations at the Women's Canadian Club reception in Toronto, in honor of Mrs. Phillips and himself at Casa Loma, the U.S. Minister declared he could never say "No" to them. That reminded him of the story which he quoted of the difference between a lady and a diplomat.

"A diplomat says 'yes' when he means perhaps; but when he says 'perhaps,' means no; and when he says 'no,' he is no diplomat. On the other hand, a woman says 'no' when she means perhaps; says 'perhaps' when she means yes, and when she says 'yes' is no lady."

Seek New Variety Of Wheat

Wheat With High Degree Of Resistance To Stem Rust Is Desired

The production of a variety of wheat combining high yield and good baking qualities with a high degree of resistance to stem rust, is one of the most pressing problems of the present time according to the Dominion Department of Agriculture. Careful consideration is being given to rust resistance in new varieties and strains developed by the Dominion Experimental Farms. New varieties are produced through the medium of artificial crossing of carefully chosen parent varieties, the crossing work being confined chiefly to the Central Farm at Ottawa, and to the Rust Research Laboratory at Winnipeg.

MISTAKES MOTHERS MAKE

IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies "eat like soldiers." This is a mistake. Such a course is almost certain to bring indigestion and the foundation of much ill-health for the little one.

Other mothers administer harsh, nauseating purgatives which in reality make and injure the delicate stomach and bowels and at the same time cause the children to dread a medicine.

Absolutely no meat should be given to a child until it is at least the age of six months, and then only if approved by the doctor. For infants, all strong, disagreeable oils and powders should be avoided, and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with milk, or water, or fruit juice, or baby. They quickly banish constipation and indigestion, relieve colds, pleurisy and fever, and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Palace Of Augustus

New Excavations On Palatine Hill Are Expected To Reveal Treasures

The new excavations which have been started on the Palatine Hill have for their ultimate object the unearthing of the Palace of Augustus. A wall nearly 200 feet long and about 20 feet high has already come to light, and it is hoped that some good marbles and other artistic objects which once adorned the residence of the Caesars will later be discovered. The Palace of Augustus actually consisted of several buildings, including a temple and two well-stocked libraries of Greek and Latin books. It is known, however, that many of the imperial buildings were buried in earthquakes during the Middle Ages, and there are hopes that a part of their treasures may still be recovered from their remains. The buildings were adorned by more than 100 columns of alabaster and rare marbles, the porticoes contained several marble statues, while the interior was lavishly decorated with panels and medallions, artistic gems and canoes.

British Youth For Canada

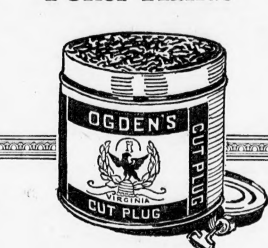

Movement Is Expected To Be Heavier Than Usual This Year

The movement of British youth to Canada promises to be considerably heavier than usual, due to new arrangements made with the British Government. Ontario is taking in many more boys from the Maritime Provinces and Saskatchewan on an indefinite number, while some hundreds are to be received by private organizations. In all it is estimated some 2,000 boys will probably be brought out under the new scheme this summer.

The less the average man knows about a thing the more he wants to talk about it.

Train Load Of Farm Tractors

Largest Train Of This Kind That Has Ever Crossed Western Canada

An indication of the prosperity and development of Western Canada was given recently when a trainload of farm tractors passed through Winnipeg westbound. Made up of 63 cars, the train was said to be the largest containing farm implements ever to cross the Canadian prairie. The bulk of the tractors will be distributed from Moffort and Humboldt, Saskatchewan, to various parts of that province. Eight cars went to different points in the province of Alberta.

Germs cannot resist the new liquid germicide known as S.T. 57, which destroys bacteria so quickly that it is impossible to figure the time in which the reaction takes place.

We blame our ancestors for our faults, just as they blamed their ancestors for theirs.

Too many persons mistake notoriety for fame.

"Tom—He's a great procrastinator."

"Mabel—He's well. He used to be the dumbest kid in school."

A fugue is a musical composition on one or more short themes which are reintroduced from time to time.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it's not! Headache, toothache, neuralgia, rheumatism, and the pain that goes with them; even neuritis, and rheumatism promptly relieved. Get Aspirin at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark registered in Canada for Bayer's Aspirin Tablets. While it is well known that Aspirin means Bayer, it is equally well known that Aspirin is a trademark, and the name Bayer is on every tablet, and on the box.

Cuticura Treatment For Dandruff

Parts the hair and gently rub in Cuticura Ointment until the whole scalp has been treated. Then the Ointment should be left on the scalp for eight or ten minutes. Then shampoo with a mild Cuticura Soap. Repeat the treatment. Cuticura Soap is sold in all drug stores. A light application of Cuticura Ointment to the scalp between shampoos is often beneficial.

Sample Pack Free. Write: Address: Cuticura Division, P.O. Box 100, Lowell, Mass., U.S.A.

Councillor Montgomery took the oath of office. Accounts examined by finance committee. Minutes of last meeting read and confirmed on motion of Conn. Harkin.

Treasurer's statement accepted and filed on motion of Cn. Edwards.

Batty—That account of Alaskan hospital referred back at last meeting for \$36 be paid.

Kinch—That Sect. Treas. write C.R.R. for price of site at Eyre, at store on Main Street.

Harkin—That agreement

Here and There

Saint John—Almost 200 new Danish colonists were added to the settlement of New Denmark in the course of the past year, and the population of the colony is now 800. Colonists are present in large numbers for increase in activity is expected in 1928.

Morris Ackerman, acknowledged as one of the leading authorities on fishing and hunting in this continent, urges protection of the season for great northern pike, grey trout and dore in Ontario and regulation of number allowed to be caught in a day below the figure of four specimens is permitted. Otherwise depletion will cause heavy loss in diminished tourist traffic.

French-Canadian folk songs are becoming more and more popular as was shown by the recent recital at the Jacob Slesper Hall, Boston, addressed by J. Murray Gibson and illustrated by songs by Charles Marchand, well-known singer of French-Canadian songs. Boston University students and many members of the Canadian Club and of Boston Musical societies attended the recital.

Ottawa—A shipment of six bacon type purebred swine from a Canadian farm to New Zealand has recently been made. Three of the hogs were Canadian type Berkshires from R. Gervin, Ontario, and were prize winners at the Royal Show. The other three were farmworts from Ontario and Quebec breeders. This is the first year that hogs have been imported into New Zealand from North America since 1916. Other shipments are expected to follow shortly.

The annual dog-racing classic—the Eastern International Dog-Sled Derby—will again be run in Quebec City, February 20-22 next under the auspices of the Winter Sports association of that city. It will cover 120 miles in the three days and already some of the best known mushers in the United States and Canada are entered for the race which carries a cash prize of \$1000 and custody for a year of a handsome gold cup.

Calgary—More than \$500,000 worth of cattle from the farms of the province of Alberta were exported to the United States between July 1st and November 30, 1927, according to the report of the American Consul at Calgary. The shipments include some 12,000 head, comprising steers, feeders and butcher cattle. The American markets at the present time are very inviting to stockmen in Western Canada and shipments have shown greater activity during the past six months than in any similar period since 1922.

Canadian Pacific Express, railway and steamships and finally an airplane were employed to carry two boxes of roses from Brampton, Ont. to Paris, France as a gift at Christmas. They were sent by Lt-Col. J. B. Macdonald of Toronto to Princess Carolyn de Faugency-Lucinge and to Countess Odon de Labarre and only the heavy snowfall that swept Great Britain at that time prevented them from being placed on these ladies' breakfast tables on Christmas morning. As it was, they arrived two days later, as fresh as though they had just been plucked.

with Estonia hospital be signed.

Batty—That the Dept. of Highways be requested to assist in improving the road at the foot of the hill through the main road to Empress; work to consist of filling, grading, and surfacing with clay; the Municipality to furnish the culvert; estimated grant required, \$100. That this be the second choice.

Dahl—That the amount paid twice by Holland Grand Mig Co., 12.48, be refunded.

Edwards—That payment of \$20.25 be made to the Royal Bank, being interest omitted in 1927 on note charged in to the Municipal account.

Edwards—That School estimates be passed as submitted by the following districts: Alaskan, Mantario, Huchview, Ainslie, Mayfield, Trustley, Winfield, Eyre, Wolf Willow, Clifton Bay, Lloyd George, Ross Muir.

Batty—That indemnity fees be paid quarterly.

The following accounts passed for payment by finance committee were ordered paid.

On motion of Cn. Kinch, first quarterly payment to be made to the school districts where the estimates had been submitted.

Alaskan Hospital \$24 00
Empress Hosp. 24 00
Estonia Hosp. 120 00 398 00
W. Crossdale, box for office 6 00

J. Adams, Balliff's fees 21 46
G. M. Tracey, legal exp. 50 00
Ben Thompson, thresh. log grain under seizure. 56 28
Stationary Supp. Conn. 18 15
Mayfield S.D., lumber supplied Roads Div. III. 6 85

\$574 45

Harkin—That this Council meet the first Saturday in April (7th) at the Orange Hall, Cuthbert.

Council adjourned at 6.30 p.m.

C. Evans Sargent, Sect. Treas.

Safety First—and Last

"Do you know," she cried to her audience, who were nearly all of her own sex, "that our present style of sensible clothing has reduced accidents on street cars, trains, and buses by at least fifty per cent?" She paused to let this sink in. It gave a bright young man his opportunity. "You'll excuse me," he said, very politely, "but why not do away with accidents altogether?"
